BE THE CHANGE

Join the initiative

The SAVE FOOD Initiative was launched in 2011 by Messe Düsseldorf and interpack, the world's leading trade fair for the packaging industry and related process industries. Since then, it has cooperated with, among others, the UN Food and Agriculture Organization (FAO) and the UN Environment Programme.

The aim of the initiative is to reduce food loss and waste by promoting innovative processing and packaging technology. Backed by a network of experts, the initiative promotes sustainable methods for a safe food supply as well as the sharing of knowledge and innovations in the industry.
